\* *Develop your ear skills:*  
Try guessing where the changes happen. With a choice of just two chords, see which sounds better—and use it!

Start on the 1 chord (that's the key you're in). The other chord in most songs is the 5. Such as G to D, or D to A. Experiment!

Check your guesswork with a songbook or knowledgeable musician. That's how it's done.

These songs are most often done with two chords, though some versions may have more.
